

<b>05/13/08 - The end of the world</b>
--

It's the end of the world as we know it.

Actually, it's the end of the world, period! Scientists and religious leaders all agree planet Earth has fewer than 400 days before it splits apart like a crushed cue ball and ceases to exist.

How do people react?

When there's a year left, what are people doing?

- Three months left?
- One month?
- A week?
- A day?
- An hour?
- A minute?

Glimpse the end of the world through various perspectives as the people of the world try to cope with the knowledge that their generation, their species, indeed the Earth itself will soon cease to exist.
